

6192 Understanding and using the updated GADSL

Objective

You will learn the current background and international goals of the amended GADSL. You are familiar with the regional structure of the GASG, the organisation and its members. You know about the structure of the Excel-based GADSL list and its criteria for the inclusion of new basic substances. This will enable you to find GADSL-relevant basic substances in the IMDS database and to identify critical basic substances in time. You have the basic skills for declaring your database in accordance with the law.

Content

- ☐ How do I register as a GADSL user and how long is my registration valid?
- ☐ What is the background of GADSL and which international goals does it pursue? Why has it been established?
- ☐ How is the GASG organised and what is its main task?
- ☐ Which criteria exist for including new declarable basic substances?
- ☐ What do the various reason codes signify?
- ☐ How is the GADSL list structured and how has it been implemented
- ☐ What to consider with the update of the GADSL list (in February each year)?
- ☐ How do I use the list to declare data in compliance with law?

Training method

Presentation and demonstration

Participants

Developers, design engineers, environment officers and quality management staff in the automotive area

Requirements
